## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 14, 2004 has been entered.

Accordingly, claim 34 was amended, claims 1-6, 22-33 and 35-37 were cancelled, and new claim 45 was added. Claims 7-21 and 44 were previously withdrawn. Currently, claims 34, 38-43 and 45 are pending in this application.

## **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a response to a restriction filed on June 04, 2003 in which claims 1-6, 22-36, 38 and 41-43 were selected by Applicant without traverse.

In the claims: please cancel claims 7-21 and 44.

***Allowable Subject Matter***

3. Claims 34, 38-43 and 45 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record fairly suggests or shows all of the limitations as claimed. Specifically,

Re claim 34, none of the prior art of record discloses, in combination with other limitations as claimed, a liquid crystal display device comprising a light shielding layer directly laminated all over by a common electrode, wherein the common electrode is wider than the light shielding layer.

The most relevant reference, US 2002/0024627 A1 of Sakamoto et al., fails to disclose or suggest a common electrode laminated all over on a light shielding layer and being wider than the light shielding layer. As shown in Fig. 1A, the Sakamoto et al.'s reference discloses a common electrode 103 directly laminated on a light shielding layer 111; however, the common electrode is not wider than the light shielding layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
